## **EFFICIENT WASTE & RECYCLING SOLUTIONS FROM OLYMPIC WIRE & EQUIPMENT, INC.**

Olympic Wire and Equipment, founded in 1997 by CEO Jim Walker, is the leading West Coast supplier of industrial baling wire and equipment for profitable and environmental waste and recycling solutions. Located in the Los Angeles area, Olympic designs, engineers and builds equipment that ranges from a simple stock of vertical balers, trash compactors, EPS Styrofoam densifiers and document shredders to large capacity auto-tie balers and sort lines for small and large material recovery facilities.

As a solution-oriented, full-service organization for the waste and recycling industry, Olympic's fair prices and long-term service help it maintain a customer base of some of the largest retail, manufacturing and distribution organizations in the United States. Olympic's innovative waste and recycling equipment systems have consistently resulted in substantial improvements for its customers' bottom line, being able to offer a wide range of products and services from manufacturers including Marathon, Balemaster, Cram-A-Lot, Vecoplan and others.

Olympic differentiates itself from competitors by offering its wire customers high-caliber post-sale care through a Continued Awareness Program, which includes free preventative maintenance inspections and free on-site training sessions from an experienced Olympic engineer.

Always innovative, Olympic is currently at the forefront of pioneering new ways to recycle and dispose of Styrofoam. Partnering with Denmark-based Runi A/S, Olympic is the sole West Coast provider of EPS Densifiers, which are designed to vastly reduce customers waste disposal costs by eliminating the problems associated with recycling Styrofoam. Olympic Wire and Equipment's team is ready to assist industry members with any of your waste and recycling equipment system needs. Olympic can be reached at (949) 646-9731 or online at [www.olympicequipment.com](http://www.olympicequipment.com).
